Even before the Piñon Canyon Art Project was founded last year, the U.S. Army had decorated the entrance to their Piñon Canyon Maneuver Site with rock art.

## Piñon Canyon Art Project announces 2009 season

By **TIM KELLER**  
The Chronicle-News

The Piñon Canyon Art Project announced its 2009 schedule Sunday, built upon the success of its first season last year. The project consists of dozens of the region's artists in various media, from across Colorado and much of northern New Mexico, who assemble on ranches in the Piñon Canyon Expansion area on the last weekend of a month to create art.

In both documenting and creating beauty, the project's artists hope to effectively add their influence to the opposition to the Piñon Canyon Expansion, the U.S. Army's proposed takeover of hundred of thousands of acres of ranchlands for expanding its existing Piñon Canyon Maneuver Site in southeastern Colorado.

Trinidad painter and teacher Doug Holdread, chairman of the TSJC art department, organized the artists' group last year to help build awareness and to raise funds for the Piñon Canyon Expansion Opposition Coalition (PCEOC). Doug's wife Lori Holdread, TSJC Learning Center Coordinator, built a powerful website, [www.thislandisourland.org](http://www.thislandisourland.org), and the two of them spread the word through e-mails and word of mouth. The number of participating and supporting

Piñon Canyon Art Project organizers Doug and Lori Holdread take an art break at the Mullen Ranch near Thatcher at the organization's first gathering last May.

artists quickly grew to 60.

The artists gathered on four monthly weekends last year at the Hass and Mullen ranches outside Thatcher, Picketwire Canyon and the Wooten Ranch, Apishapa Canyon and the Roberts Ranch near Walsenburg, and the Loudon Ranch near Branson.

Doug Holdread points out that the

names of these places, alone, belies a widespread impression that the Piñon Canyon Expansion area consists of little more than barren grasslands. In fact, most of the affected land consists of family ranches, many of which have been in the same families for a hundred years. As for the diverse and

## TLAC unemployment rate rises another percentage point

By **MICHAEL GARRETT**  
The Chronicle-News

Trinidad and Las Animas County's unemployment rate rose another percentage point in March to 8.7 percent with the number of unemployed workers reaching 758 workers compared to 682 who were unemployed in February. The county's unemployment rate now exceeds the state's as a whole.

The county showed a total labor force of 8,674 workers with 7,916 employed during the month. In February, the figures were 8,859 for a labor force, 8,177 employed and a 7.7 percent unemployment rate.

Huerfano and Pueblo Counties' unemployment rates remained relatively stable at 10.1 and 9.1 percent, respectively from February's totals of 10.0 and 8.9 percent.

Although local gasoline pump prices have been inching upward in recent weeks, Raton Basin natural gas industry employers have given little if any indications that well drilling activities will be resuming anytime soon unless gas prices start rising more dramatically.

Colorado's seasonally adjusted jobless rate increased three-tenths of one percentage point to 7.5 percent in March, according to Donald J. Mares, executive director of the Colorado Department of Labor and Employment. "While deteriorating national economic trends continue to adversely impact Colorado's workforce, the state's current jobless rate is still a full percentage point lower than that of the U.S.," he noted. The current rate is the highest since 7.7 percent was registered in May 1987. Last March the share of the labor force unsuccessfully seeking work stood at 4.6 percent.

The number of employed Colorado residents, adjusted for normal labor force movements, fell 13,000 over the month to 2,522,100. Last March an estimated 2,597,400 Coloradans were working. The number of jobless rose 8,300 to 204,800 during the month, up 79,400 from the same period last year.

Unemployment continued to trend upward throughout much of Colorado with 47 counties reporting higher unemployment rates, eleven posting lower rates, and six showing no change over the month. Dolores County, at 15.6 percent, registered the highest rate; Yuma and Cheyenne counties, both at 3.8 percent, recorded the lowest rates.

### Wage and Salary Employment

According to the monthly survey of Colorado business establishments, total non-farm employment inched up 1,900 to 2,271,700 during the month. The gain, which fell well short of seasonal expectations, was the smallest March increase since 1975 and only one-tenth of the average March increase over the past five years.

Employment changes were mostly small with the number of gaining and losing industries about evenly split. Government led the gainers with the addition of 2,800 jobs, followed by leisure and hospitality, up 1,400, and professional and business services, up 1,100.

Construction employment usually increases in March with the return of warmer weather, but the still sluggish residential and non-residential segments contributed to the industry shedding 2,100 positions over the month. Employment in manufacturing and financial activities slipped
